## PROJECTS

**WeGoToo** | Software Engineer | [wegotoo.herokuapp.com](http://wegotoo.herokuapp.com)

New York, NY | 2016

React Native iOS social application which adds a community to the native maps. Users can see each other on the map, chat, and create/record/share routes.

- Implemented client-side for map and created route views based on custom React Native map component
- Built functionality to show multiple users on the map using realtime geolocation data and websockets
- Implemented functionality to create custom map annotations, send request to Google API and create/draw route based on detailed data as well as store this data to the database
- Architected feature that draws a route as a user moves based on their geolocation data
- Designed landing page

**SoundBoard** | Software Engineer | [drumboard.herokuapp.com](http://drumboard.herokuapp.com)

New York, NY | 2016

React web application that allows users to bind different sounds to the keyboard

- Created Library view for the existing SoundBoard application based on React with search/save/upload new sound functionality
- Connected to the Freesound.org API and Implemented wavesurfer.js to show sound signal
- Managed full redesign of the UI

**Fridge** | Product Owner & Software Engineer | [your-fridge.herokuapp.com](http://your-fridge.herokuapp.com)

New York, NY | 2016

Web application that allows users to create personal tasks, assign tasks for other users and organize group tasks

- Led front-end development of web application built using AngularJS, Node.js/Express, and MongoDB
- Collaborated with back-end team to implement authentication and interaction with REST API
- Utilized HTML/CSS and Bootstrap to create clean responsive user interface

**Your Favorite Artist** | Sole Engineer | [your-favorite-artist.herokuapp.com](http://your-favorite-artist.herokuapp.com)

New York, NY | 2016

Web application that enables users to research and view information about music artists, upcoming events and listen samples of their top 10 songs

- Implemented client-side application based on AngularJS and Node.js/Express with a deadline of 36 hours
- Integrated 2 APIs (Spotify, Bandsintown) to get information about artists, songs samples and upcoming events
- Utilized HTML/CSS and Bootstrap to create clean responsive user interface

## EXPERIENCE

**Affinity Solutions** | Senior E-mail Marketing Specialist | [affinitysolutions.com](http://affinitysolutions.com)

New York, NY | 2014 - 2016

- Built responsive HTML templates designed to work across 40+ e-mail clients for over 3,000,000 end users
- Managed, planned, and executed email marketing campaigns, including audience segmentation, data processing, pre-deployment testing, and quality control
- Point person for team interaction with in-house developers, marketing department, and creative department

**ALOR** | Proprietary Trader | [alor.ru](http://alor.ru)

Ufa, Russia | 2009 - 2014

- Managed proprietary trading account with daily trading limit of \$200,000
- Consistently increased trading limit by earning 1.5% weekly
- Lead team of three that was responsible for trading stocks, futures, and options on MICEX and RTS exchanges

## EDUCATION

**MakerSquare** | Advanced Software Engineering Immersive | [makersquare.com](http://makersquare.com)

New York, NY | 2016

**Ufa State Petroleum Technological University** | M.S. Production Process Automation Engineer

Ufa, Russia | 2009

## Personal

My favorite memory: I hiked 12 miles from Cooper Mountain through Colorado trails to “Janet’s Cabin” — a secluded retreat only accessible by foot or helicopter — and then snowboarded back down with Metallica blasting in my headphones. I was in the mountains for 4 days. Nothing quite like it.
