PROJECTS

WeGoToo | Software Engineer | github.com/KarmicKoalas/KarmicKoalas **New York, NY | 2016**
React Native iOS social application which adds a community to the native maps. Users can see each other on the map, chat and create/record/share routes.

- Implemented client-side for map and created route views based on custom react-native-maps component
- Built functionality to show multiple users on the map using real time geolocation data
- Architected feature that draws a route as a user moves based on their geolocation data
- Functionality to create custom map annotations, send request to Google API and create/draw route based on this data

SoundBoard | Software Engineer | drumboard.herokuapp.com **New York, NY | 2016**
React web application that allows users to bind different sounds to the keyboard

- Created Library view for the existing SoundBoard application based on React with search/save/upload new sound functionality
- Connected to the Freesound.org API and Implemented wavesurfer.js to show sound signal
- Implemented new styles for the full application

Fridge | Product Owner & Software Engineer | your-fridge.herokuapp.com **New York, NY | 2016**
Web application that allows users to create personal tasks, assign tasks for other users and organize group tasks

- Led front-end development of web application built using AngularJS, Node.js/Express, and MongoDB
- Collaborated with back-end team to implement authentication and interaction with REST API
- Utilized HTML/CSS and Bootstrap to create clean responsive user interface

Your Favorite Artist | Sole Engineer | your-favorite-artist.herokuapp.com **New York, NY | 2016**
Web application that enables users to research and view information about music artists, upcoming events and listen samples of their top 10 songs

- Implemented client-side application based on AngularJS and Node.js/Express with a deadline of 36 hours
- Integrated 2 APIs (Spotify, Bandsintown) to get information about artists, songs samples and upcoming events
- Utilized HTML/CSS and Bootstrap to create clean responsive user interface

EXPERIENCE

Affinity Solutions | Senior E-mail Marketing Specialist | affinitysolutions.com **New York, NY | 2014 - 2016**

- Built responsive HTML templates designed to work across 40+ e-mail clients for over 3,000,000 end users
- Managed, planned, and executed email marketing campaigns, including audience segmentation, data processing, pre-deployment testing, and quality control
- Point person for team interaction with in-house developers, marketing department, and creative department

ALOR | Proprietary Trader | alor.ru **Ufa, Russia | 2009 - 2014**

- Managed proprietary trading account with with daily trading limit of \$200,000
- Consistently increased trading limit by earning 1.5% weekly
- Lead team of three that was responsible for trading stocks, futures, and options on MICEX and RTS exchanges

EDUCATION

MakerSquare | Advanced Software Engineering Immersive | makersquare.com **New York, NY | 2016**
Ufa State Petroleum Technological University | **M.S.** Production Process Automation Engineer **Ufa, Russia | 2009**

Personal

My favorite memory: I hiked 12 miles from Cooper Mountain through Colorado trails to “Janet’s Cabin” — a secluded retreat only accessible by foot or helicopter — and then snowboarded back down with Metallica blasting in my headphones. I was in the mountains for 4 days. Nothing quite like it.
